PANTHEON Farming: discontinuation of further development

Dear user,

Due to our inability to obtain further funding, we have made the decision to discontinue further development of the PANTHEON Farming software solutions as of August 1, 2019. However, we have continued to support the operation of PANTHEON Farming in accordance with the new versions of the PANTHEON SE/ME/MF business package.

As of January 14, 2025, we have discontinued further compatibility development. This means that we will no longer develop improvements and fixes for the program or ensure compliance with legislation. PANTHEON Farming will continue to run smoothly on the current version 100.41.00, released on January 14, 2025. However, it will eventually no longer be compatible with newer versions of PANTHEON and, as a result, with new legislation and features.

What if I use PANTHEON Farming?

Your next steps depend on how you are using the program now and your plans for the future.

1. I have PANTHEON Farming installed on my computer

1.1 I use the program only for keeping farming records

In this case, you may continue to use the program uninterrupted on the current version. However, please note that you will be blocked from upgrading the database, as we will no longer provide newer versions of the program.

1.2 I use a combination of PANTHEON Farming and PANTHEON (SE, ME, MF) licenses or I use PANTHEON Farming to issue invoices, prepare VAT returns, post reports, etc.

In this instance, we will install two program licenses on your computer. This will be done by making a copy of the database, installing a license on each version, and installing the two programs. With this setup, you can continue to use PANTHEON Farming to manage your farming records with no updates, while also utilizing PANTHEON (SE, ME, MF) to oversee your business operations, such as receipts, invoices, payments, and more. Please note that PANTHEON Farming will remain

> **Warning:**
>
> Reports required by law, fiscalization and other statutory features must be prepared in PANTHEON SE/ME/MF version, as PANTHEON Farming may have outdated formats!

free of charge, while other PANTHEON licenses will be charged according to the price list.

You can continue to process data on subject, item, order registers, goods and material documents, etc. from PANTHEON Farming in PANTHEON, but you will have to transfer them from the PANTHEON Farming database to another PANTHEON database using the Data Import/Export feature, or the USD support department can also set up automatic synchronization using shared registers and automated transfer of the documents from one database to another database.

2. I have PANTHEON Farming installed in a hosted environment

2.1 I use the program only for keeping farming records

As in point 1.1, the use of PANTHEON Farming is free of charge, however, you are still liable for the cost of renting (leasing) the Cloud database space.

2.2 I use a combination of PANTHEON Farming and PANTHEON (SE, ME, MF) licenses or I use PANTHEON Farming to issue invoices, prepare VAT returns, post reports, etc.

As in point 1.2, except that in this case, in addition to the monthly cost of using the PANTHEON license (SE, ME, MF), you also incur the additional cost of storage space for the two databases in the cloud.

If you prefer to continue using PANTHEON (or PANTHEON Farming), but not in a Cloud (hosted) environment, we can download and install your database on your computer, where you can use it free of charge.

Likewise, you can continue to process data on subject, item, order registers, goods and material documents, etc. from PANTHEON Farming in PANTHEON, but you will have to transfer them from the PANTHEON Farming database to another PANTHEON database using the Data Import/Export feature, or the support department can also set up automatic synchronization using shared registers and automated transfer of the documents from one database to another database.

If you no longer intend to use PANTHEON Farming, we can provide you with an archive copy of the database upon request.

3. I use the PANTHEON Farming mobile application

As with PANTHEON Farming, development and support for the **FA Mobile** mobile application are being discontinued as well. Like PANTHEON Farming, you can continue to use the mobile app, but in this case your PANTHEON Farming database must remain in the cloud, as we will not perform local server installations. In this case, you will be charged a monthly cost of storage space for your PANTHEON Farming database.

All the downloads and installations described above are free of charge to you. **Those of you who use PANTHEON Farming in the Cloud (hosting) environment are kindly requested to notify us of your decision by 31 March 2025 at the latest. After this date, we will disable access to the database and archive it.**
